

First Periodic Certification Statement

Bureau Veritas Certification has performed the 1st periodic verification of the “**Bannari Amman Spinning Mills Wind Power Project managed by Enercon (India) Ltd**” project in **India, which applies the methodology AMS I.D. version 16**. The verification was performed based on the requirements set by the CDM and relevant guidance provided by CMP and the CDM Executive Board.

The verification consisted of the following three phases: i) desk review of the project design and the baseline and monitoring plan; ii) follow-up interviews with project stakeholders; iii) resolution of outstanding issues and the issuance of the final verification report and opinion.

The management of **Enercon (India) Limited** is responsible for the preparation of the GHG emissions data and the reported GHG emissions reductions of the project on the basis set out within the project monitoring plan indicated in the registered PDD. The development and maintenance of records and reporting procedures in accordance with that plan, including the calculation and determination of GHG emission reductions from the project, is the responsibility of the management of the project.

Bureau Veritas Certification verified the Project Monitoring Report version **03** for the reporting period as indicated below. Bureau Veritas Certification confirms that the project is implemented as described in validated and registered project design documents. Installed equipment being essential for generating emission reduction runs reliably and is calibrated appropriately. The monitoring system is in place and the project is generating GHG emission reductions.

Bureau Veritas Certification can confirm that the GHG emission reduction is calculated without material misstatements. Our opinion relates to the project's GHG emissions and resulting GHG emissions reductions reported and related to the valid and registered project baseline and monitoring, and its associated documents. Based on the evidence and information that are considered necessary to guarantee that GHG emission reductions are appropriately calculated, Bureau Veritas Certification confirms the following statement:

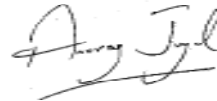

Reporting period: From 01/08/2011 to 30/06/2012
Baseline emissions : 14,753 t CO₂ equivalents.
Project emissions : 0 t CO₂ equivalents.
Leakage emissions : 0 t CO₂ equivalents
Emission Reductions : 14,753 t CO₂ equivalents.
